Mohammad Mirmousavi

Front End Developer

SUMMARY

I am a **front-end developer** with 10+ years of experience in software development. Most of my activities have revolved around the web and in recent years I have also been working on hybrid mobile applications. My specialty is **web development** and I am focusing my efforts in this area.
Along with my main expertise, I have worked on other fields like **back-end development**, **Linux system administration**, and **DevOps** to fulfill my own requirements. During my career, I have always been a Linux user which made me comfortable with Terminal environments.
I am always on the hunt for new, cutting-edge technologies and seek for unorthodox ways to be innovative.

EXPERIENCES

Senior Front End Developer at Snapp

Apr. 2017 – Present *(About 2 Years)*

Snapp is the leading ride-hailing app in Iran, active in more than 30 cities.
I have led the front-end team to develop internal projects, most notably:

- Developing Web Applications with Vue.js. Live example: Corporate Portal for Snapp
- Developing a Progressive Web App with React. Live example: Web App for Snapp

Co-founder & Front End Developer at KarBaTo

Oct. 2016 – Mar. 2017 *(6 Months)*

KarBaTo is an Iranian startup which provides an online marketplace enabling users to outsource everyday tasks, including cleaning, moving, delivery and handyman work.
I have been responsible for entrepreneurship and project management as well as web development that included:

- Developing Web and Mobile Applications with JavaScript (Cordova & Ionic)
- Developing Android Applications with Android SDK
- Developing Web Applications with Ember.js and Vue.js

CTO at Rasa Web

Aug. 2014 – Sept. 2016 *(2 Years & 2 Months)*

Rasa Web company is a subsidiary of Kowsar Institute, specializing in technical development and maintenance of a scientific journals publishing platform.
My role and responsibilities included:

- Developing Web Applications with PHP, MySQL, PostgreSQL, JavaScript
- Directing all phases of web projects in the company
- Managing the road-map of product design and development

Full Stack Developer at Kowsar

Jan. 2010 – Jul. 2014 *(4 Years & 7 Months)*

Kowsar Institute is an international publisher and information analytics business that helps institutions and professionals improving their performance.
My role and responsibilities included:

- Developing Web Applications with PHP, MySQL, and PostgreSQL
- Configuring Web server, FTP server, Mail server, DNS server, Git, etc.
- Writing and implementing scripts to maintain production services
