Mohammad Mirmousavi

Front End Developer

👤 SUMMARY

I am a full-time web developer. I have more than 10 years of experience in software development. Most of my activities have revolved around the web, whiling shifting my focus more towards hybrid mobile applications in recent years. My specialty is Frontend development and I am focusing my efforts in this area.

Along with my main expertise, I have worked in other capacities like Backend Development, Linux System Administration and DevOps to fulfill my own requirements. During my career, I have always been a Linux user and that's why I am well acquainted with DevOps and System Administration.

I am always on the hunt for new, cutting edge technologies.
